Gateway ne56r41u battery removal

The 10.8V 4400mAh(6 cells) Gateway NE56R41U laptop battery is made of high-quality lithium-ion battery cells, which has been tested to be brand new and totally compatible with the original manufacturer specifications, meets or even exceeds the original battery performance. With high-quality battery cells and materials, your laptop will run longer and more secure. Moreover, this battery has no "memory effect" and you don't need to discharge before each charge. It is more convenient for you to use our replacement Gateway NE56R41U batteries. Our Gateway NE56R41U laptop battery which we design is in strict accordance with the highest control standards. It carries with a smart interior circuit board that provides battery-unbalanced-shut-off protection, thermal runaway protection, overcharged protection, over-discharged-shut-off protection, and high/low-temperature-shut-off protection. Gateway NE56R41U notebook battery is made of environmentally friendly materials, without lead and mercury. It is certified as a safe and reliable product through a series of rigorous tests on the Gateway examine system. Thank you for shopping the Gateway NE56R41U replacement battery at LaptopBatteryDirect.net. Our batteries are packed in cartons with anti-static bags and anti-pressure sponges to effectively protect the batteries in transit. We have a rigorous inspection process to ensure that your order (e.g. Gateway NE56R41U replacement battery) is perfectly functional before shipping to you. Before placing an order, you'd better look at our battery from following pictures and check if it is the same as your original one. Please make sure that you pick out the correct battery to avoid ordering mistakenly. 1-Year Warranty We offer Full 1 Year Warranty on our Gateway NE56R41U laptop battery. Warranty is applicable if the buyer has installed the battery properly on the device and has treated the battery correctly. 30-Day Money Back Guarantee 30 Day Money Back Guarantee if you are not satisfied with our Gateway NE56R41U notebook battery. We will check all functions of our all products before delivery. Please note: in order to qualify to get your money back, you must first contact us and await instructions before sending back your product. Returns If there is any problem with the battery you purchased from us, please contact us first. We will proceed your request and seek solutions to your problem. If our technical engineers cannot solve the problem, we will generate the RMA number for you (Return Merchandise Authorization) so that you can return the battery to us. If test result indicates that the returned battery is defective, we will bear the shipping cost of the battery. Please note: we cannot process returned batteries if you have not yet received an RMA number. Q: How do I select the right replacement battery for my laptop? A: First of all, you need to assure the model of your laptop or the part number of your laptop battery. Then look for the battery you need at laptopbatterydirect.net. Finally, you can check whether the battery you find is compatible with your laptop or not on the "Compatibility" table (for example, Gateway NE56R41U). If you don't know how to find the right laptop for your laptop battery, you can click How to find one correct battery for my laptop? for more details. Moreover, you can click the icon "Live Chat" on the right of this page to ask us. Q: How to charge the Gateway NE56R41U laptop battery properly? A: You should charge the replacement battery for Gateway NE56R41U laptop before the battery exhaustively discharged, otherwise it will shorten its life. It is feasible to charge the laptop battery before the power is less than 20%. Meanwhile, the battery should be charged in a dry place, and please pay attention to high temperature, which is the biggest threat to battery life. Q: How to deal with the replacement battery for Gateway NE56R41U when you won't use for a long time? A: If you let your Gateway NE56R41U laptop battery lay idle for a long time, please charge the laptop battery or discharge to about 40%, and then put it in a dry and cool place to save. Indoor temperature is best maintained at 15 to 25 degrees Celsius because the temperature is easy to accelerate the battery aging either too high or too low. You'd better fully charge and discharge the battery at least once a month. Finally please save it in accordance with the above method. Q: How to replace your Gateway NE56R41U Laptop Battery? 1Turn off your Gateway NE56R41U laptop and disconnect the AC adapter. 2Release the latch or other attachment devices that hold your battery in place. 3Slide the old battery out of its compartment or storage bay 4Take the replacement battery for Gateway NE56R41U laptop out of the box. 5Slide it into the notch or bay. 6Close the safety latch to lock it into place. 7Reconnect the AC adapter and give the new battery for your Gateway NE56R41U notebook a full charge. Today, bluevelvetrestaurant.com would like to introduce to you Gateway Laptop NE56R41u - Remove Hard Drive and battery. Following along are instructions in the video below: " s going to be a little video on how to pull a hard drive out out of a gateway. This one working fine till. Mr. Putin. The cat came by spilled some stuff on it so basically you want to pull you actually need to have a motherboard put in it so i m going to pull the hard drive get the information. I got another laptop on order right now and you re going to be interested to probably to see what i order because i didn t want to go to walley world or i just got one from a vendor that redoes them and you know this you just pull this just the battery lock. You pull this out of the way and you lift up the battery so so after you pull that little orange lock to the right because i was so excited to read directions. I was wondering buddy this battery. Oh you see they slide you pull that little orange lock to the right that lifts up it like it hinges out of the way hmm now. What i should have done when this was originally doused with some tea green tea or something. When i had i should have done it was turned it upside down about an hour later a circle. I m rebooting and bop bop bop as that oh then i pulled the battery turn it upside down was too late so you got to take these two screws out to get at the hard drive. Now. I know probably have said just thing you got to cry open. It prise open after you it s dis just snaps in place you got to kind of go longer with the edge.. . Always like taking this little blade. Here probably can t do this one handed with the camera. But it does you can see how it snaps out yeah well i did get it there. It is here. There s your memory. And here s your hard drive. So take this bad boy out i use you like this knife. Because it s like it s really good for these little phillips screws. There you go right and you know what s interesting. I got this new and walmart. It wasn t a reconditioned and i m looking here s a screw missing. There screw missing here s a screw missing. So if i would have had this on the side and tapped it this way this could have just slid right the hell out this was the heart. It s just laying in there. There s all screws holding their head.. . It s not a reconditioned don t know what the hell. They did with that so now um just put my little attachment on with the usb and pull the information off it. But what i m probably going to do. Though is get a hard drive. I mean excuse me a motherboard with the exact model working condition with the memory installed with the processor. Because if you get an upgrade usually got to get everything else and probably change it out myself. And i might be able to do that so so be it right so bid. So be it just bitch back right now. So that s really going to do to take this out actually i have the software to really call it do an image for that and that s like i keep images somewhere. I didn t do one on this computer anyway so if thinking maybe that s a good thing. It s all hard to take the hard drive out. But it you know this is the first time. I took it out of this one and i was surprised no screws that s telling me they re selling stuff brand new that s been refurbished or sent back amazing huh. What else is know and that s one reason. I m picking out i ll see what it is actually. . It s a there s a couple tricks to it on picking it up it s uh xp and there s a way to get there s a hack to get all the updates security updates for xp even now i think up through 2019. There s a hack for that and it s a three year warranty. With a 500 gig drive and i said to myself. I d rather go with that i d rather go with that because so my hardware like i have newer scanners. But some of my older scanners. The only work with xp no mic you know i m gonna let the hell they really improve windows. 8. Isn t this piece of crap. I like windows 7 professional. But i like it windows 7 professional with classic shell installed with as many bells and whistles disabled as possible and also effective file search like i said i like all these gimmicks are coming out with man. I don t know what the hell they re really doing once they made assistant. The computer is stable. I mean i don t really don t know what the hell they did to fix them except a marketing gimmicks. So that s how you take out the drive. And it s always a good idea to image your drive. . Because this is usually the place that freakin craps out and but in my case. It was the motherboard due to mr. Meow meow. But i totally forgive him immediately. He s just a cat he ll think i am get my camera here well there. He is he s up there on his little meow meow shelf up near the ceiling. He collects it we have to earn the car it can go all the way down here see he goes all the way down. There there he is he s actually very good cat. I think its tail knocked into that tee and knocked it on my motherboard. So that s what happened you re forgiving a little guy wish you know how to fix computers man. " ..
